PERMIT FEES

New Residential: \$500+**\$23.00 Surcharge** ♦ New Commercial: \$700+**\$23.00 Surcharge**

New Driveway: \$150.00 ♦ Driveway Registration/Repair/Upgrade: \$100.00

Repair/Upgrade of Tank and Leach Field: \$300 +**\$23.00 Surcharge** ♦ Repair/Upgrade of Field: \$150

Repair/Upgrade of Tank: \$100 ♦ Undocumented ISDS Permit Fee: \$100 ♦ Re-inspection Fee: \$75 ♦ Terra Lifting:
\$50 Permit Renewal: \$100 (1 year) ♦

SEPTIC APPLICATION INSTRUCTIONS/DOCUMENTATION/INSPECTIONS

Before applying for your septic or driveway permit, submit the (1) completed Planning and Zoning Sheet (attached), (2) the most current *Warranty Deed* for the property and (3) the Plot Plan to the *Planning Department*. Please refer to the "Checklist of Required Information for the Planning and Zoning Sheet" for required distances and dimensions. Call the Environmental Health Department (PCEHD) at 719-836-4267 for directions to the Development Services Building.

Your permit fee includes the following inspections: Profile Hole, Open Hole (if specified in the permit), Final, and well distance measurement. If more time is necessary, permits may be extended. The ISDS permit is valid for a period of one year from the date of issue.

1. Complete the ISDS Permit Application and return it to the PCEHD along with your *approved* Park County Planning and Zoning Sheet and required documents. Please include the applicable permit fee made payable to PCEHD. *Your tax schedule number and signature must be included on the application.*
2. All systems shall be engineered by a registered professional engineer. Application shall be submitted with engineering. PCEHD can supply a list of registered engineers. Design's over two years old must be reviewed before renewal is granted.
3. PCEHD can provide a list of county licensed installers.
4. A driveway cut permit is required with any other development permit, such as a septic permit and building permit. Applications for driveway and septic at the same time is required unless applying for a driveway cut only.

Septic and Driveway permits expire one year from date of issue. It is the responsibility of the owner, applicant, or contractor to schedule inspections. Because of the volume of permits processed, the PCEHD cannot be responsible to contact each applicant.

Site Preparation for the ISDS Prior to Inspections

- The approved address (may be obtained from the Mapping Department 719-836-4288) must be posted on the property at all times.

- The owner, applicant, or contractor must stake the proposed well, leach field, house, proposed accessory structures and property corners.
- A Profile Hole must be dug eight feet deep and the width of a backhoe bucket inside the proposed leach field area. This Profile Hole must be dug with an ingress/egress so the inspector and other living beings can walk out of the hole. If bedrock or groundwater is encountered in the hole, explore other areas where a leach field may be located.

ISDS Permitting and Inspection Timeline

- The owner, applicant, or contractor must call PCEHD to arrange a Profile Hole Inspection after the site preparation is completed. Call the Inspection Line at **719-836-4267** to schedule the inspection. Please indicate if the driveway is ready to be inspected (refer to the instructions for marking the driveway in the Driveway Cut Permit Information attached). If all conditions are favorable for an ISDS to be installed, the applicant can generally receive their permit five to seven working days after the Profile Hole Inspection (7-10 working days from May-September). This varies, based on volume and time of year.
- The owner, applicant, or contractor must call the PCEHD at least two days in advance when installation of the ISDS system has been completed and a final inspection of the uncovered system is needed. However, we cannot guarantee that a final inspection will be done within 48 hours.

The following must be completed before your septic system will be "closed." Your driveway and ISDS must be closed before an inspection for a Certificate of Occupancy will be scheduled from the Park County Building Department. *PLEASE NOTE: It is the responsibility of the owner, applicant, or contractor to provide the paperwork. Because of the volume of permits processed, the PCEHD cannot be responsible to contact each applicant for missing paperwork.*

- **Copies of your well permit and the "well log":** (Construction and Test Report) indicating depth of well, gallons per minute, etc. The company that drilled your well can supply this information. These also may be obtained from the Colorado Division of Water Resources (303-866-3587 or www.water.state.co.us) if one was not supplied by your well driller. *The well must be installed prior to final approval of your septic system. If a cistern is being used, a letter from the owner stating this is acceptable.*
- **Final letter and an "as built" drawing:** Following field inspections, the owner shall submit an engineer's as built and certification bearing the engineers seal. File is completed and approved at the office after the well permit and drillers log is received.

Once PCEHD receives all the required paperwork, we will give final approval for your septic system which will enable the Building Department to schedule their final inspection for your Certificate of Occupancy.

NOTICE: SEPTIC PERMIT DOES NOT CONSTITUTE A VESTED RIGHT

THE APPLICANT AND OWNER ARE EACH RESPONSIBLE FOR ENSURING THAT THE PLANNED USE AND/OR STRUCTURE(S) ARE LEGALLY PERMITTED AND AUTHORIZED BY THE APPLICABLE COUNTY ZONING AND COUNTY LAND USE REGULATIONS. THE APPLICANT AND OWNER ARE EXPRESSLY INFORMED BY THIS NOTICE THAT THE COUNTY MAY DENY FURTHER PERMITS AND AUTHORIZATIONS IF THE PLANNED USE AND/OR PROPOSED STRUCTURE(S) DO NOT CONFORM TO THE APPLICABLE COUNTY ZONING AND COUNTY LAND USE REGULATIONS. BY ACCEPTANCE OF THIS PERMIT, THE APPLICANT AND OWNER EACH ACCEPT THE RISK THAT THE PLANNED USE AND/OR PROPOSED STRUCTURE(S) SATISFY ALL OTHER APPLICABLE COUNTY REGULATIONS AND REQUIREMENTS.

I.S.D.S. REPAIR/UPGRADE PERMIT

If you are building an addition to or remodeling your home and your *current* permitted ISDS has been found to be insufficient for the number of bedrooms (either existing or being proposed), you will need to do the following:

- Contact a local Park County licensed septic cleaner (a list is available from the Environmental Health Department). Ask if they are certified through the NSF Onsite Wastewater Inspector Accreditation Program.
- Expose the complete top surface of the septic tank (the cleaner may do this).
- If the following information is *not* in your current septic file, the licensed septic cleaner should provide the following information about your system:
 - Size of the tank (single or 2 compartment), concrete or plastic.
 - Size of the leach field (infiltrators or rock & pipe system).
 - Number of bedrooms.
 - An "As Built" drawing of the system and its relationship to adjacent wells, setbacks to property lines, dry gulches, watercourses, on-site well, and existing or proposed structures.
- *Before applying for your repair permit, follow the instructions at the top of this "Application Instructions" to submit the necessary paperwork to the Planning & Zoning Department. The paperwork is attached.*
- Apply for a Septic Repair Permit through the Environmental Health Department. The above information from the septic cleaner will need to be submitted with the application. The application fee is \$100 which includes our initial inspection.
- Once the documentation and repair application is received by the Environmental Health Department, we will schedule an inspection by a P.C.E.H.D. inspector to evaluate the site and verify the documentation.
- After the initial inspection, you will be issued a detailed repair permit. Applicable permit fees will apply. Following the final inspection and approval, submit an 'as built' along with a copy of the well permit and driller's log. Well records are obtained from the Colorado Dept. of Water Resources: 303-866-3447

Driveway Cut Permit Information

Every person, firm, or corporation who wishes to construct a driveway accessing a Park County or private road must first obtain a driveway cut permit. Permits may be obtained from the Park County Environmental Health Department. Your driveway must be finalized before a Certificate of Occupancy will be issued from the Park County Building Department. Your permit fee includes the following inspections: Preliminary and Final inspection. *It is the responsibility of the owner, applicant, or contractor to schedule inspections. Because of the volume of permits processed, the PCEHD cannot be responsible to contact each applicant.*

The Application Process

Prior to submitting the application for a Driveway Cut Permit and before any driveway inspection can be made you must first:

1. Clearly stake the intended site of driveway construction.
2. Post your physical address as shown on page 2. (The address may be obtained from the Mapping Department: 719-836-4288)
3. Submit the following to the *Planning Department* (located in the bottom southwest corner of the Development Services Building) for approval:
 - The completed Planning & Zoning Sheet (included with this application)
 - A Plot Plan (with a detailed drawing of the proposed driveway including the name of the frontage road and the nearest crossroad). Please include the distance (in feet or mileage) from the nearest intersection to make locating your property easier.
 - The most current *Warranty Deed* for the property.

Submit the completed Driveway Cut Permit Application with the above approved paperwork to the Environmental Health Department with the \$150.00 fee.

The Driveway Cut Permit is good for one year from the date of issue. If more time is necessary, permits may be extended. Contact the Environmental Health Office to renew your permit. A fee of \$50 is required to renew for another year.

Please note: An additional fee will be assessed in the amount of \$75 for each additional inspection beyond the 2 inspections (Preliminary and Final) included with your permit. Circumstances that would generate an additional inspection could include the property owner's failure to comply with the above specifications or County standards in construction.

Site Preparation

"POSTED" ADDRESS REQUIREMENTS

Park County Land Use Regulation
Section 7-1207 Address Number Signage

Park County requires properties undergoing development to have a permanent address posted. This address post is permanent and is not just for the inspector but is for the use of the Fire Department, Sheriff and Emergency Services. The street address numbers need to be posted on the property prior to the preliminary inspection of the driveway.

- ❑ Placard shall be attached to a 4" X 4" treated wood or redwood post.
- ❑ The post shall be placed at the driveway no further than 5 feet from the property line. **Note: The post must not be placed in the county road right-of-way.**
- ❑ The top of the post shall be installed, in a permanent fashion, a minimum of 48 inches above the ground. If the ground is frozen, place the post in a 5 gallon bucket filled with sand or rock until the post must be permanently installed into the ground for final inspection.

Standard Size - 6" x 18"

Standard Color - Green Background with White Reflective Numbers

Preliminary Inspection

- Prior to the construction, a preliminary inspection of the property must take place and the inspector must approve the site. Please call the PCEHD at 719-836-4267 to schedule this inspection. *It is the responsibility of the owner, applicant, or contractor to schedule inspections. Because of the volume of permits processed, the PCEHD cannot be responsible to contact each applicant.*
- During this inspection the inspector will determine whether or not a culvert is needed, as well as any other recommendations or requirements for the driveway construction. Once you have received a copy of your permit with preliminary approval, you may start construction. *PLEASE NOTE: A fine up to twice the amount of the permit may be assessed if construction begins prior to the preliminary inspection.*

Construction and Installation

- All driveways and approaches need to be constructed so they do not interfere with the drainage of the roadway.
- All final surface materials used in the construction of the driveway must match the existing surface of the county road for the first 10-20 ft.
- If a culvert is required, the inspector will specify the size and dimension on the permit. *Park County does not accept plastic culverts.* Culverts must be a minimum of 15" CMP with 12" of cover (24" of cover if aluminum) to be at even grade with the road surface.
- The minimum length of the driveway needs to be 20' with 2' end exposures. The first 10' beyond the traveled portion of a county road must slope down and away from the county road to ensure proper drainage control. *PLEASE NOTE: No driveway will be permitted with a slope greater than 10%. Exceptions may be made when steep topography makes this requirement very difficult to fulfill. In such cases, the Environmental Health Department will require an approved engineered design that will protect the roadway from drainage flows. At no time will road material be taken or used from the county right-of way.*
- All driveways that access a County road or right-of-way shall have a minimum surface width of eighteen (18) feet at the edge of the pavement or road surface. *Please refer to the specific instructions on your permit.* The driveway shall be located at a minimum of 10 ft. from any property corner and out of any utility easement. If this happens, the homeowner will be held responsible.

You may request a copy of the complete driveway standards from the Environmental Health Department office.

Final inspection

A final inspection must be scheduled through the Environmental Health Department. The inspection process may take at least two weeks to complete depending upon the season of the year. Upon completion of your driveway, please call the Inspection Line at **719-836-4267** to schedule the Final Inspection. Please plan accordingly. *It is the responsibility of the owner, applicant, or contractor to schedule inspections.*

You will receive confirmation of the approved Final Inspection in the form of a letter.

COUNTY RIGHT-OF-WAY DISCLAIMER

CONSTRUCTION IMPROVEMENTS OR STRUCTURES WITHIN THE COUNTY RIGHT-OF-WAY SHALL BE PERMITTED THROUGH APPLICATION TO THE COUNTY. ALL PERMITS ISSUED ARE IN FACT REVOCABLE ENCROACHMENT LICENSES. ANY IMPROVEMENTS CONSTRUCTED OR INSTALLED WITHIN THE COUNTY RIGHT-OF-WAY SHALL BE INSTALLED, MAINTAINED AND REPAIRED AT THE PERMIT HOLDER, HIS/HER HEIRS, SUCCESSORS-INTEREST, ASSIGNS AND OCCUPANTS SOLE COST AND EXPENSE. THE COUNTY SHALL NOT BE HELD RESPONSIBLE FOR ANY IMPROVEMENTS LOCATED ON THE COUNTY'S RIGHT-OF-WAY. THE PERMIT HOLDER, HIS/HER HEIRS, SUCCESSORS-IN INTEREST, ASSIGNS AND OCCUPANTS FURTHER ACKNOWLEDGES AND AGREES THAT THE COUNTY IS NOT AND WILL NOT ASSUME ANY LIABILITY, RESPONSIBILITY, OR COSTS FOR ANY DAMAGE, MAINTENANCE OR REPAIR OF ANY IMPROVEMENTS OR STRUCTURES ERECTED OR MAINTAINED BY PERMIT HOLDER WITHIN THE COUNTY RIGHT-OF-WAY.

Section 7-204 Driveways

- A. Driveways shall serve no more than two (2) residential Lots. Driveways shall not provide service or access to commercial or industrial zoned property unless approved by the Planning Department.
- B. All driveways serving or located on more than one Lot shall be created by written and recorded easement, plat, deed, or other legally accepted documentation, which ensures perpetual and permanent access and which demonstrates consent and approval of all fee owners of property upon and through which the driveway is located.
- C. Driveways shall meet the following requirements:

	Minimum Width of Traveled Surface	Minimum Centerline Curve Radius	Maximum Linear Distance from Access	Maximum % of Grade Within First 50 Feet from Road	Maximum % of Grade After the First 50 Feet From Road
Driveway serving one or two single family residential lots	16 feet	30 feet	Per Zone District	1 st 10 feet <2%, then 10%	12%
Driveway serving three or four single family residential lots	20 feet	40 feet	1000 feet	1 st 10 feet <2%, then 10%	12%

The environmental health director may, at his sole discretion, grant modifications of the standards in the chart above as long as the modifications are less restrictive. The Board of Adjustment may also grant variances from the standards in the chart above, according to the procedures and requirements of article iii of these land use regulations.

- D. All driveways shall be designed to match as nearly as possible to natural and existing topography of the site. Earth disturbance shall require mitigation measures designed to prevent rock-fall, southing, erosion, or other adverse soil conditions.
- E. All driveways greater than two hundred (200) feet in length shall be constructed of and shall maintain an all weather surface.
- F. All driveways shall be maintained in a condition, which permits reasonable emergency vehicle access to the principal structures on the property.
- G. Cross culverts shall be installed at locations where driveways cross natural drainage-ways.
- H. Switchbacks on driveways shall maintain a maximum of 8% grade through the length of the switchback.
- I. More restrictive intergovernmental agreements will supersede this section.

Section 7-205 Driveway Paving

- A. Paving of driveways that meet public roads shall obtain a paving permit from the Road & Bridge Department.
- B. Existing driveways that will be paved shall comply to current driveway standards including but not limited to grades, culverts, widths and drainage (refer to Section 7-204 appendix D Article IV 4.5)
- C. Meet all requirements as described on the paving permit.
- D. The County is not liable for any damages to paved driveways.

Section 7-206 Snow Removal from Driveways

- A. Homeowners and residents are responsible for maintaining their own driveways and property.
- B. After (the date of adoption of these land use regulations), major subdivisions shall provide easements for the storage of snow removed from rights-of-way. Other such developments may be required to do so at the discretion of the planning director or designee.
- C. Snow removed from one portion of a resident's property must not obstruct pedestrian or vehicular traffic.

Section 7-702 Obstructions in Rights-of-Way

Colorado Revised Statute 43-5-301 prohibits persons or corporations from placing any obstruction on any public highway. Under the law a person or corporation can be fined if found guilty, and held liable to any person, unit of government, or corporation in civil action for any damages resulting from the obstruction.

PARK COUNTY PLANNING & ZONING SHEET

1246 Park County Road 16 • P.O. Box 1598 • Fairplay, CO 80440-1598
Phone: (719) 836-4254 • Fax: (719) 836-4351 • Email: pcpd@parkco.us

The purpose of this document is to assist the Park County Planning Department to determine the zoning of the property, the setback requirements, and other important Park County Land Use requirements needed for the permitting processes. **Please read the directions carefully.**

If the applicant is not the owner of the property, a notarized letter of authorization is required from property owner, giving the applicant permission to obtain permits or conduct a site evaluation. If the property owner is an entity other than a person(s), supporting documentation to verify who is permitted to sign for that entity will be required.

If the application is for a **SITE EVALUATION** or **DRIVEWAY** please fill in only the items with an asterisk (*).

Please note:

If the property is zoned agricultural and is less than 160 acres but greater than 35 acres, a **pre-August 2, 1983** recorded warranty deed is required.

If property is zoned agricultural and less than 35 acres, a **pre-1972 recorded warranty deed** is required.

Parcels less than 35 acres, not in a subdivision, attach a Warranty Deed with metes and bounds description recorded prior to **August 8, 1967**.

The applicant is responsible for the accuracy and completeness of all information submitted to the Planning Department.

Applicant and Land Owner Information

*Email address: _____

*Applicant's name: _____ *Applicant's phone: _____

*Applicant's mailing address: _____ *City: _____ *State: _____ *Zip: _____

*Land Owner (if different than above applicant): _____ *Owner's phone: _____

*Owner's mailing address: _____ *City: _____ *State: _____ *Zip: _____

Setback Measurements and Property Information

*Tax Schedule number: _____ *Address of property: _____

- *Permit application is for: (check all that apply) complete septic system septic tank repair
 leach field repair driveway accessory structure deck / cover addition remodel
 site evaluation excavation demo basement finish commercial use: _____
 residence (other than manufactured home) manufactured home (min. 600 square feet at grade)

Distances from the *leach field* to the following below:

Well: _____ Nearest property line: _____ Nearest building: _____ Wetlands and/or Watercourses: _____

Distances from the *septic tank* to the following below:

Well: _____ Nearest property line: _____ Nearest building: _____ Wetlands and/or Watercourses: _____

Distances from any *proposed buildings* to the following below:

Nearest existing building: _____ Wetlands and/or Watercourses: _____

Please be aware of the Environmental health setbacks if you are installing a holding tank, cistern, vaulted privy, or other alternative septic system components.

Requirements for the Plot Plan (MUST be completed regardless of application)

- 1. A plot plan, sketched on a recorded plat for properties in subdivisions, or a survey plat for properties in metes and bounds, showing the location of the:
 - Existing and proposed structures with dimensions **including** the height, square footage, and the distance between the structures.
 - Roads, streets, and easements.
 - Driveway.
 - Septic tank(s), and leach field(s).
 - Wetlands and watercourses.
 - A north arrow.
 - Overhead utilities lines. Or wind generators
- 2. If a temporary construction dwelling is being occupied during construction, the property owner must fill out the **Affidavit to Register and Occupy a Construction Dwelling as a Temporary Use**
- 3. All setback measurements from existing buildings, proposed buildings, septic system, wells, wetlands and watercourses to *all* property lines.
- 4.* Lot size with property line dimensions.
- 5.* Current Recorded Warranty Deed showing the full legal description, Or Current Quit Claim Deed With A Previous Warranty Deed Demonstrating Title. Planning Staff can help with this requirement.
- 6.* If there are multiple names on the current Warranty Deed other than Joint Tenancy, all others listed must provide a notarized letter stating approval for the construction project.
- 7. Location of all parking spaces, if commercial.
- 8. If one of the following public processes has been performed, please attach a copy of the recorded resolution: Conditional Use Permit, Exemption for Illegal Parcels, Exemption from Subdivision, Rezoning, Road Vacation, Special Use Permit, and/or a Variance.
- 9. If one of the following administrative processes has been performed, please attach a copy of the signed Compliance Reports: Administrative Plat Amendment, Boundary Line adjustment, Exemption for Illegal Parcel, and/or a Lot consolidation.
- 10. Proposed use is permitted in the current zone district.
- 11. If the application is for Medical or Retail Marijuana Business, please attach a copy of applicable Local and/or State Licenses.

Disclaimer

By signing below, I understand that I am responsible for the accuracy of the plot plan and the physical placement of all improvements on the property. I accept full responsibility for compliance with all Park County setback requirements and Land Use Regulations.
